GITHUB PROJECTS

Portfolio 🔗   02/2023
In this project i made my own personal responsive website using html, css and JavaScript.
Click Demo 🔗 .

Hotel reservations management 🔗   08/2022
In this project we provide reservation service for some hotel and manage the guests and rooms.
I achieved this software using only php language and focused on produce great software consider clean code principles and mvc pattern.

Poster website 🔗   01/2023
In this project we have many different users (make, delete, update and save posts) with different roles and permissions, so i achieved these tasks using laravel framework and suitable packages to make interesting posting experience.
